SUMMARY

Motivated Artificial Intelligence and Data Science Engineering student with a strong interest in Web Motivated Artificial Intelligence and Data Science Engineering student with a strong interest in Machine Learning, Data Analytics, Web Development, and IoT systems. Enthusiastic about exploring data-driven decision-making, intelligent automation, and AI-powered solutions that create real-world impact.

Eager to enhance practical expertise through hands-on projects, hackathons, and AI-driven research challenges. Passionate about innovation, teamwork, and building smart, scalable, and sustainable systems that bridge technology and human needs.

EDUCATION

SHRI MADHWA VADIRAJA INSTITUTE OF TECHNOLOGY AND MANAGEMENT

Bachelor of Engineering
Major in AI and DS
Cumulative GPA: 8.9/10

Bantakal Udupi
Expected August 2027

VIDYODAYA PUBLIC SCHOOL

Class XII – 92.5%
Class X – 95%

Udupi
Jul 2020 – Jul 2023
Jul 2019 – Jul 2021

TECHNICAL SKILLS

- **Programming:** Python, Java, C++, C
- **Web Technologies:** HTML, CSS, JavaScript, React.js
- **Tools & Platforms:** MongoDB, MySQL, Firebase, Android Studio, VS code, Collab, Canva, PowerBI
- **Areas of Interest:** Artificial Intelligence, Machine Learning, Cybersecurity, Web & App Development
- **Core Subjects:** Data Structure, DBMS, Artificial Intelligence, Machine Learning
- **Soft Skills:** Leadership, Teamwork, Communication, Problem Solving, Adaptability

UNIVERSITY PROJECTS

AI BASED MULTI-FEATURE IMAGE INTELLIGENCE ANALYSIS OF ELEPHANT (*ongoing*)

Mar 2026

- Developing a Non-invasive monitoring system for Asian Elephant using Artificial Intelligence and Machine Learning. System uses field and camera trap images to perform multi-task analysis such as age estimation, disease detection, musth detection and behavioral analysis such as predicting normal vs aggressive condition of elephants to alert the forest department to protect life and prevent human vs elephant conflict.

NOSEWEAR PREDICTION OF TOOL TIP- SMART MONITORING SYSTEM

Nov 2025

- Developing Nose-Wear, an AI-powered predictive maintenance tool that uses Convolutional Neural Networks (CNN) and Long Short-Term Memory (LSTM) models to analyze sensor data and machining parameters for accurate tool wear prediction. The system enables early fault detection, process optimization, and productivity improvement in manufacturing environments through real-time monitoring and intelligent forecasting.

AI POWERED CORAL REEF MONITORING SYSTEM

Sep 2025

- Designed an AI monitoring system to support coral reef restoration by analyzing water temperature, pH, turbidity, and oxygen levels. Implemented machine learning algorithms to predict reef bleaching risks and recommend timely conservation actions, contributing to marine ecosystem preservation and sustainability.

SAFESEND – LIGHTWEIGHT SECURE FILE TRANSFER

Aug 2025

- Developed a secure, lightweight file transfer system optimized for low-bandwidth environments, enabling safe document sharing across remote offices. It features end-to-end encryption (AES/RSA), multi-level authentication, and role-based access control, ensuring data confidentiality, integrity, and reliable performance in low-connectivity regions.

CROP MATE – REAL TIME SOIL ANALYSIS SYSTEM

Jan 2024

- Crop Mate is an IoT-based smart soil monitoring system developed using an ESP32 with NPK and pH sensors to analyze soil nutrients and moisture in real time. Data is stored on Firebase and visualized in a mobile app with color-coded indicators for easy interpretation. An integrated AI Chatbot and voice assistant provide personalized crop and fertilizer recommendations, weather insights, and multilingual support for farmers.

ACHIEVEMENTS AND ACTIVITIES [Drive](#)

- Winner – Infosys Mudipu Hackathon (Pre-final Year Recognition).
- Winner in Project Exhibition MITE Mangalore.
- Winner in Poster Presentation at MIT Manipal and Poorna Prajna College.
- Runner in 36hr Hackathon Sahyadri College of Engineering.
- Runner in Ideation Competitions at Shivamogga JNNCE.
- Runner in Paper Presentation at Srinivas Mukka, Canara Engineering College.
- 2nd Runner in Project Exhibition at Adichunchanagiri Mahasamsthana Math, Mandya.
- Best Animation award at Reva University 36hr Gamethon.
- Active Volunteer – IEEE SMVITM Events & Technical Competitions
- Active participation in multiple workshops and competitions held in and around Udupi, Mangalore and Karnataka
- IEEE Student Branch MDC coordinator.
- IEEE WIE Branch Chair.
- Received an Award of \$500 to Conduct Arduino-Based Activities for Govt School Students for IEEE Bang. Section
- Received “Best Student Award” in SMVITM for the year 2024-2025 and 2025-2026.
